Subject: FUNDING

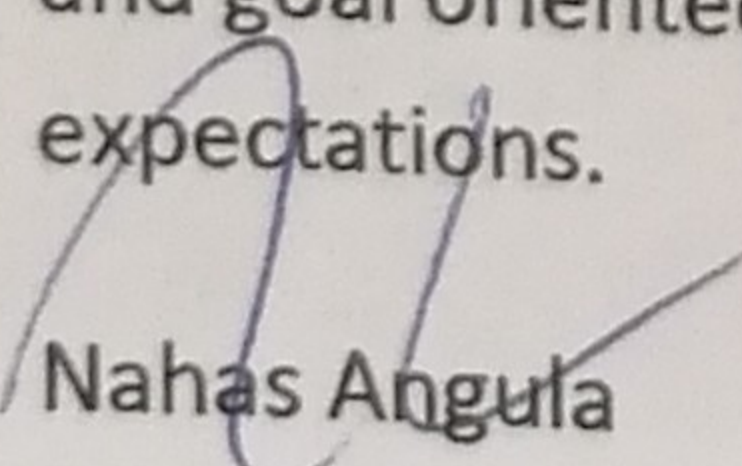

TO WHOM IT MAY CONCERN

MISS WILHELMINA NDAPEWA ONYOTHI NEKOTO

Miss Wilhelmina Ndapewa Onyothi Nekoto is a young talented and highly motivated Namibian lady who has specialized in Data Science Engineering. She is a rare individual whose interests range from Data Engineering, Radio Astronomy to Deep Learning. She is further interested in technology of nature conservation and would like to develop a rhino tracking technology for rhino conservation. In addition she is planning to develop a prototype tour guide application for the tourism sector in Namibia.

For this reason Miss Nekoto is applying for funding to travel from Germany to Namibia to collect data on fauna and flora, rock art and landscapes to enable her to realize her ambitions. Chapter 11(I) of the Namibian Constitution mandates, "... the maintenance of ecosystems, essential ecological and biological diversity of Namibia and utilization of living natural resources on a sustainable basis for the benefit of all Namibians". Miss Nekoto's efforts are aimed at enhancing this Constitutional mandate.

I am writing therefore to support her application for funding for her noble endeavours towards nature conservation and the protection of Namibia's ecosystem. I have known Miss Nekoto of being resilient and goal oriented. I trust, given support to realize her ambitions, she will indeed live up to the expectations.

  
Nahas Angula

Former Prime Minister of Namibia
